1 **Introduction**

2 The State of California, acting by and through the State of California Department of Parks
3 and Recreation (State Parks) submits the following reply which further shows that the demurrer
4 should be sustained without leave to amend. As a general matter, the Opposition incorrectly cites
5 to and relies on multiple cases involving private entity premises liability cases that were not
6 statutory actions brought under the Government Claims Act. (See e.g. Opp., p. 5:11-24.)
7 However, as discussed in the moving papers, “there is no common law tort liability for public
8 entities in California; instead, such liability must be based on statute.” (*Guzman v. County of*
9 *Monterey* (2009) 46 Cal.4th 887, 897.) The intent of the Act is to “confine potential
10 governmental liability to rigidly delineated circumstances.” (*DiCampli-Mintz v. County of Santa*
11 *Clara* (2012) 55 Cal.4th 983, 991.) For sake of brevity and continuity, this reply follows the
12 order of the arguments set forth in the moving papers.

13 1) **The Demurrer Should be Sustained Without Leave to Amend as to the Dangerous**
14 **Condition Causes of Action**

15 a. **The Demurrer Should be Sustained Without Leave to Amend Because the**
16 **Allegations of the Master Complaint Fail to Establish a Dangerous Condition Within**
17 **the Meaning of Government Code Section 830**

18 The Opposition effectively concedes that State Parks cannot be held liable for the fire
19 started by the arsonist on January 1, 2025, stating “plaintiffs do not allege that the State is liable
20 because it did not stop an arsonist from starting the Lachman Fire on January 1.” (Opp. p. 18:14-
21 15.) In this regard, plaintiffs concede that they “have not alleged that the State’s property at
22 Topanga State Park was in a dangerous condition *before* January 1.” (Opp. p. 6:17-18 (emphasis
23 in the Opposition).)

24 However, the Opposition also concedes that the reignition on January 7 was a result of
25 rekindled smoldering embers left over from the fire started on January 1. (Opp., p. 7-8, Master
26 Complaint (MC) ¶¶ 77-78.) The Master Complaint refers to this smoldering ember as a
27 “firebrand” that “continued to smolder within the root structure of the vegetation.” (MC, ¶ 75;
28 citing the criminal complaint - *U.S.A. v. Rinderknecht*, USCD Case No. 2:25-mj-06103-DUTY,
fn. 10, Ex. A to the Req. for Jud. Notice.) In this regard, the criminal complaint refers to the

1 Palisades fire as a continuation of the Lachman fire “meaning that they were essentially the same
2 fire that burned and/or smoldered continuously.” (Ex. A ¶ 9, including fn. 1.)¹ The arsonist was
3 charged with setting “the fire known as the Lachman fire and Palisades fire.” (Ex. B to Req. for
4 Jud. Notice.)

5 Thus, plaintiffs’ opposition and allegations show that the rekindling that occurred on
6 January 7 was a continuation of the same fire started on January 1. Therefore, since the fire
7 started by the arsonist on January 1, for which plaintiffs concede State Parks is not liable,
8 continued as the same fire that reignited on January 7, it follows that, pursuant to *Zelig v. County*
9 of Los Angeles, (2002) 27 Cal.4th 1112, the reignition on January 7 is not a dangerous condition
10 for which State Parks can be liable.

11 It is well established that “public entities generally are not liable for failing to protect
12 individuals against crime.” (*Id.* at p. 1126.) The *Zelig* Court emphasized that “liability is
13 imposed only when there is some defect in the property itself and a causal connection is
14 established between the defect and the injury.” (*Id.* at p. 1135.) Plaintiffs allege a smoldering
15 ember in the burn scar as the dangerous condition at issue. (Opp., p. 8:15-16.) However, the burn
16 scar and any underground residual ember therein were directly caused by the arsonist starting the
17 fire on January 1. But for the act of arson, there would have been no burn scar or underground
18 residual ember that could have reignited on January 7. Thus, a causal connection between a
19 separate physical defect in the park property itself cannot be established.

20 The court in *Avedon v. State of California*, (2010) 186 Cal.App.4th 1336, held that third
21 parties wrongfully starting a wildfire in a State Park did not constitute a dangerous condition for
22 which State Parks could be held liable. (*Id.* at p. 1344.) Here, the conduct of the arsonist in
23

24 ¹ As discussed in the Request for Judicial Notice, consideration of statements in the criminal
25 complaint are appropriate on a demurrer. A court “may consider documents referred to in the
26 complaint” in considering a motion to dismiss in federal court. (*Dreiling v. Am. Exp. Co* (9th Cir.
27 2006) 458 F.3d 942, 946, fn.2.) “Documents whose contents are alleged in a complaint and
whose authenticity no party questions, but which are not physically attached to the pleading, may
be considered in ruling on a Rule 12(b)(6) motion to dismiss.” (*Branch v. Tunnell* (9th Cir. 1994)
14 F.3d 449, 454.)

1 starting the fire on January 1 clearly was unrelated to the condition of the Topanga State Park
2 property itself and therefore does not constitute a dangerous condition, as a matter of law.

3 In addition, the underlying premise of plaintiffs' allegations are that State Parks should
4 have stationed personnel up in the area of the fire from January 1 through 7 to inspect and
5 monitor for possible embers in the root structure of the vegetation that could potentially rekindle.
6 However, "a lack of human supervision and protection is not a deficiency in the physical
7 characteristics of public property." (*Cerna v. City of Oakland* (2008) 161 Cal.App.4th 1340,
8 1352.) Thus, State Parks' personnel not engaging in this type of fire protection activity cannot be
9 construed as a physical defect in the park property.

10 **b. The Demurrer Should be Sustained Without Leave to Amend because the Allegations
11 of the Master Complaint Fail to Establish Actual or Constructive Notice, as a Matter
of Law**

12 Even assuming that the rekindling that occurred on January 7 could be construed as a
13 separate fire or condition of the property, the Master Complaint fails to sufficiently allege actual
14 or constructive notice. First, plaintiffs' allegations fail to establish actual notice because it is not
15 enough to show that State Parks' employees may have had a general knowledge that a fire can
16 sometimes occur under the alleged conditions, including the presence of a burn scar and the
17 possibility of a holdover fire in the area. "There must be some evidence that the employees had
18 knowledge of the particular dangerous condition in question." (*State of California v. Superior
Court of San Mateo County* (1968) 263 Cal.App.2d 396, 399.) In *State of California*, the court
19 held that, as a matter of law, a general knowledge that people left hot coals on the beach could not
20 provide actual notice of the particular hot coals on the beach that the 2 1/2 year old plaintiff sat in.
21 (*Id.* at p. 399-400.) Here, general knowledge that an underground ember could have remained
22 somewhere in the eight acre burn area could not provide actual notice of the particular ember that
23 reigned on January 7.

25 With regard to constructive notice, plaintiffs' allegations are clearly insufficient. As
26 discussed in the moving papers, every fact material to the existence of a public entity's statutory
27 liability "must be pleaded with particularity." (*City of Los Angeles v. Superior Court* (2021) 62
28 Cal.App. 5th 129, 138.) Plaintiffs have not done so.

1 The Opposition generally references the entire burn scar area and the possibility of
2 underground embers located in it. However, the existence of a burn scar by itself would not
3 provide constructive notice that a fire would occur. Every wildland fire that occurs in the State of
4 California leaves some form of a burn scar. The potential that there may be an underground
5 ember in a burn scar that may reignite into a fire does not reasonably mean that a rekindling of an
6 ember in a burn scar will occur. To assume otherwise would mean that every wildland fire burn
7 scar throughout the state would constitute constructive notice of a dangerous condition.

8 With regard to constructive notice of the underground ember that caused the rekindling on
9 January 7, there is no allegation in the Master Complaint that there was any visible indication of
10 any flame, smoke or smoldering embers in the burn scar area from January 2 up until the report of
11 the rekindling of the fire on January 7. In addition, the Los Angeles Fire Department (LAFD) had
12 notified State Parks on January 1 that the fire was fully contained at approximately 4:48 a.m. and
13 that it was extinguished. Furthermore, plaintiffs fail to explain how the existence of smoldering
14 on January 1, the day the fire was started, could provide notice of the burning ember that reignited
15 on January 7, when there is no allegation of any visible indication of smoke or smoldering from
16 January 2 until the reignition on January 7.

17 In addition, plaintiffs' allegation generally referencing the entire burn scar, which
18 comprised approximately eight acres, as potentially providing notice of the underground ember
19 that reignited on January 7 is excessively vague and overbroad. This point is illustrated by
20 referencing the satellite photo at page 24 of the Master Complaint showing the outline of the
21 January 1 burn scar in red. The origin point of the rekindling on January 7 is shown with a
22 yellow dot to the south of the southern perimeter of the burn scar area. Thus, as an example, the
23 existence of some obvious indication of smoldering or smoke at the northern end of the burn scar
24 could not logically provide constructive notice of the ember that caused the reignition at the
25 southern end of the burn scar on January 7. In other words, plaintiffs must allege that there was
26 some obvious indication of smoke or smoldering in a specific area that could reasonably be
27 construed as causing the rekindling at the yellow dot origin point shown to the south of the
28 southern perimeter of the burn scar. They have not done so.

1 Furthermore, the Master Complaint fails to allege that the underground ember that caused
2 the reignition on January 7 was obvious. “A claim for constructive notice has *two* threshold
3 elements. A plaintiff must establish that the dangerous condition has existed for a sufficient
4 period of time and that the dangerous condition was obvious. (*Heskel v. City of San Diego* (2014)
5 227 Cal.App.4th 313, 320, (citation omitted and emphasis in original).) Plaintiffs appear to
6 concede the necessity of making this allegation as the opposition includes the general and
7 conclusory assertion that the burn scar and its smoldering embers constituted an obviously
8 dangerous condition. (See e.g. Opp., p. 8:27-28.) However, the Master Complaint fails to
9 contain this required allegation.

10 Plaintiffs' citation to *Carson v. Facilities Development Co.*, (1984) 36 Cal.3d 830, for the
11 concept that the question as to whether a dangerous condition could have been discovered by
12 reasonable inspection may present an issue of fact bypasses the required threshold showing that
13 an obvious danger existed. (*Id.* at p. 842; citing *State of California, supra*, 263 Cal.App.2d at p.
14 400.) In this regard, the *State of California* court held that "the primary and indispensable
15 element of constructive notice is a showing that the *obvious condition existed a sufficient period*
16 *of time before the accident.*" (*Id.* at p. 400, (emphasis in original).) The method of inspection is
17 secondary. (*Id.*) In other words, the issue as to whether was a reasonable inspection system in
18 place does not come into play until and unless an obvious dangerous condition has been properly
19 alleged.

c. **The Demurrer Should be Sustained Without Leave to Amend Because Parks is Immune from Liability, as a Matter of Law**

22 Plaintiffs incorrectly assert that the fire protection immunity does not apply to preclude
23 liability for a dangerous condition on a public entity's own property. In *Prokop v. City of Los*
24 *Angeles*, (2007) 150 Cal.App.4th 1332, the court made clear that a Government Code section 835
25 action based on a dangerous condition of a public entity's property is subject to any immunity
26 provided by statute to the public entity. (*Id.* at pp. 1337-1338.) The court in *New Hampshire Ins.*
27 *Co. v. City of Madera*, (1983) 144 Cal.App.3d 298, noted that causes of action premised on a

1 dangerous condition of property theory under Government Code section 835 are subject to the
2 immunity statutes under sections 850 through 850.4. (*Id.* at p. 305.)

3 In *Cairns v. County of Los Angeles* (1997) 62 Cal.App.4th 330, the Second District Court
4 of Appeal affirmed the sustaining of a demurrer without leave to amend holding that a dangerous
5 condition cause of action based on a closed County owned road that resulted in fire damage to
6 plaintiffs' homes was precluded by the immunity under Government Code sections 850, 850.2
7 and 850.4. (*Id.* at pp. 333-334.)

8 Plaintiffs also incorrectly assert that the immunity under sections 850 and 850.2 only
9 applies to services provided while fighting fires. *Cairns* did not involve providing of any fire
10 protection while fighting a fire or otherwise. The plaintiffs alleged that the County failed to
11 repair and reopen the subject road that served as a fire access road, which had been closed for
12 many years, before the subject fire started. (*Id.* at pp. 333, 335.) The court held that, "defendants'
13 failure to repair and reopen a damaged closed road merely to have it available as an alternative
14 fire road is, in these circumstances, a failure to provide fire protection service or fire protection
15 facilities within the immunities of sections 850, 850.2, and 850.4." (*Id.* at p. 336.) (See also
16 *Cochran v. Herzog Engraving* (1984) 155 Cal.App.3d 405, 412-413 [Govt. Code sections 850,
17 850.2 and 850.4 precluded liability based on pre-fire inspection that failed to find dangerous
18 condition that caused fire].)

19 Plaintiffs' argument that the immunity under section 850 and 850.2 applies only to active
20 firefighting activity is based on cases such as *Varshock v. Department of Forestry & Fire
21 Protection*, (2011) 194 Cal.App.4th 635, which addressed immunity under Government Code
22 section 850.4 finding this immunity is limited to an act or omission while responding to or
23 combating an actual fire. (*Id.* at p. 643.) However, State Parks is not asserting immunity under
24 section 850.4. *Varshock* did not address the immunity under sections 850 or 850.2.

25 *City and County of San Francisco v. Superior Court*, (1984) 160 Cal.App.3d 837, cited by
26 plaintiffs, addressed immunity under section 850.4 and 850, and supports application of section
27 850 immunity in this case. (*Id.* at p. 842.) There, plaintiffs' real property caught fire and an
28 individual ran approximately 300 feet directly to defendant's firehouse to report the fire.

1 However, the personnel at this firehouse had left to participate in an improper dinner gathering at
2 another firehouse. This unauthorized absence from the firehouse delayed the response to the fire
3 resulting in extensive damage to the subject real property. (*Id.* at pp. 838-839.)

4 The court, noting that section 850.4 provides immunity to employees while they are
5 fighting fires, held: “However, even if section 850.4 could be so narrowly construed as to apply
6 to actions only after the firemen reached the fire, the immunity of section 850 would apply for
7 then the acts of the firemen must be viewed as a failure ‘to provide fire protection service.’” (*Id.*
8 at p. 842.) Thus, not providing any fire protection by not responding to a fire scene is covered
9 under section 850 immunity.

10 *People ex rel. Grijalva v. Superior Court*, (2008) 159 Cal.App.4th 1072, also supports
11 application of the immunity under section 850 in this case. In *Grijalva*, firefighters initially had a
12 brush fire 90 percent contained but failed to douse the flames completely and instead began to
13 demobilize its firefighting resources resulting in the fire later burning out of control. (*Id.* at pp.
14 1075-1076.) The *Grijalva* court ordered that the underlying motion for judgment on the
15 pleadings should have been granted without leave to amend because the immunity statutes
16 preclude liability based on the fire protection service, personnel, equipment or other fire
17 protection facilities, “they provide, *or do not provide.*” (*Id.* at p. 1078; citing Gov.Code, §§ 850,
18 850.2, 850.4 (emphasis added).) Thus, not providing fire protection by deciding not to remain at
19 a fire scene to monitor for a possible rekindling is covered by section 850 immunity.

20 In addition, in attempting to distinguish *Cochran*, plaintiffs incorrectly assert that State
21 Parks is relying on the inspection immunity of Government Code section 818.6, which it is not.
22 In fact, the *Cochran* court held that the “sweeping” language of Government Code sections 850,
23 850.2 and 850.4 also precluded liability:

24 “Aside from the immunity provided by Government Code section 818.6, the trial
25 court cited and relied on three other immunity statutes: Government Code sections
26 850, 850.2 and 850.4. The language of these provisions is sweeping, and they have
27 been broadly construed by the courts in this state to provide immunity under
28 circumstances quite similar to those before us. We find that these statutes are
 applicable here, and provide further immunity for the City in the instant case.”

28 (*Cochran*, *supra*, 155 Cal.App.3d at pp. 412-413.)

1 The *Cochran* court further noted that, “Government Code sections 850 and 850.2 protect
2 public entities from liability by providing governmental immunity for an unreasonable failure to
3 maintain sufficiently adequate fire-protection service, even when a public entity has undertaken to
4 provide such service.” (*Id.* at p. 413.) The clear inference from this statement, consistent with
5 the Law Revision Comment to section 850, is that the immunity under section 850 precludes
6 liability when a public entity has not undertaken to provide fire protection.

7 Furthermore, the allegations upon which the *Cochran* court determined that immunity
8 under sections 850 and 850.2 precluded liability are similar to the asserted bases for liability
9 against State Parks in this case. The *Cochran* plaintiffs asserted that the City of San Mateo had a
10 duty to inspect the location that burned in order “to correct or remedy any hazardous conditions
11 liable to cause fire, and to require the use of adequate protective measures, including suitable fire
12 detecting and extinguishing devices; and that the breach of these duties subjected it to liability.”
13 (*Id.* at p. 410.)

14 Similarly, here, plaintiffs allege that State Parks had a duty to inspect the burn scar area to
15 correct or remedy a hazardous condition in the form of an underground ember that was liable to
16 cause fire, and to use adequate protective measures, including suitable fire detecting devices such
17 as a thermal imaging device, and that the breach of these duties subjects State Parks to liability.
18 However, *Cochran* makes clear that liability is precluded under section 850 based on these
19 allegations.

20 Furthermore, plaintiffs’ strained effort to analogize the facts of *Vedder v. City of Imperial*,
21 (1974) 36 Cal.App.3d 654, to the facts presented here lacks merit. Comparing the storage of
22 large quantities of highly combustible gasoline at an airport without special equipment for
23 gasoline fires to undeveloped land with naturally growing chaparral and vegetation in a State Park
24 defies logic and common sense. As discussed in the moving papers, the *Cairns* court correctly
25 distinguished *Vedder* from the facts in that case which apply equally to the facts in this case.
26 (*Cairns, supra*, 62 Cal.App.4th at p. 336.)

27 An additional distinguishing factor from *Vedder* is that, in that case, there was no means
28 available at the County airport where the fire occurred to control a gasoline fire. (*Vedder*,

1 supra, 36 Cal.App.3d at p. 659.) Here, there were means to control the subject brush fire in that
2 LAFD handled the fire response, including mop-up, and advised that the fire was extinguished.
3 (MC, ¶ 371, p. 115:8.)² Here, plaintiffs essentially allege that State Parks should have provided
4 additional fire protection by inspecting the burn scar area after LAFD completed its work to
5 locate the underground ember that caused the reignition on January 7.

6 Plaintiffs attempt to distinguish *Cairns* by asserting, without any authority, that this case
7 involves “the smoldering embers in the burn scar- [that] actually started and caused the Palisades
8 Fire, rather than merely upsetting firefighting efforts.” (Opp. p. 15:25-28.) The plain language of
9 section 850 and 850.2 contain no such limitation and such an asserted interpretation is clearly
10 inconsistent with the “broad” immunity conferred by section 850 and 850.2. The *Cairns* court
11 noted that “these sections provide for a *broad* immunity from liability for injuries resulting in
12 connection with fire protection service.” (*Id.* at p. 335, (emphasis in original).)

13 “Sections 850 and 850.2 provide an absolute immunity from liability for injury
14 resulting from failure to provide fire protection or from failure to provide enough
15 personnel, equipment or other fire protection facilities. *Whether fire protection*
16 *should be provided at all*, and the extent to which fire protection should be
17 provided, are political decisions which are committed to the policy-making
18 officials of government.”

19 (*Id.*; quoting Gov. Code, § 850, Law Revision Commission Comments, (emphasis added).)

20 Plaintiffs also attempt to distinguish *Puskar v. City and County of San Francisco*, (2015)
21 239 Cal.App.4th 1248, by asserting, without recitation to any authority, that the fire protection
22 immunities are limited only to decisions that make firefighting more difficult or impede the
23 response to a fire. (Opp., p. 16:17-19.) However, there is no case law remotely suggesting that
24 fire protection immunity is limited to actions that impede the response to a fire or make fire
25 fighting more difficult. As discussed above, this assertion is entirely inconsistent with the plain
26 language of the statutes and applicable case law which makes clear that the fire protection
27 immunity under section 850 applies where no fire protection is provided at all.

28
2 As discussed in the moving papers, the area of the subject fire was within a local agency
29 responsibility area. (See Pub. Resources Code §§ 4125-4127.)

1 Here, as discussed above, LAFD handled the fire response on January 1 and advised State
2 Parks that it was extinguished. Clearly, State Parks not providing further fire protection by
3 inspecting for underground embers, with or without a thermal imaging device, to essentially
4 recheck the work of LAFD after it completed its work, as plaintiffs allege should have been done,
5 is a decision that falls within the “whether fire protection should be provided at all” language of
6 the Law Revision Commission Comment to section 850. Therefore, the immunity under
7 Government Code Section 850 applies and bars this action as against State Parks.

8 In addition, the *Puskar* court’s criticism of the *Vedder* decision is well taken. In this
9 regard, the *Vedder* court’s incorrect statement that these immunity statutes “must be strictly
10 construed” is at odds with the *Cairns* holding that “these sections provide for a *broad* immunity
11 from liability.” (*Cairns* *supra*, 62 Cal.App.4th at p. 335, (emphasis in original).) That the *Vedder*
12 court incorrectly construed the immunity statutes is confirmed by the California Supreme Court
13 decision in *Teter v. City of Newport Beach*, (2003) 30 Cal.4th 446. In *Teter*, the plaintiff asserted
14 that, under the Government Claims Act, liability is the rule and immunity the exception. The
15 *Teter* Court rejected this assertion stating that “plaintiff is quite wrong about that.” (*Id.* at p. 451.)
16 The court reiterated its statement in *Zelig* that the intent of the Act is “not to expand the rights of
17 plaintiffs in suits against governmental entities, but to confine potential governmental liability to
18 rigidly delineated circumstances.” (*Id.*) In this regard, at noted by the *Cairns* court, immunity
19 provisions will, “as a general rule prevail over all sections imposing liability.” (*Cairns*, *supra*, 62
20 Cal.App.4th at p. 334.)

21 Plaintiffs also rely on *Pittam v. City of Riverside*, (1932) 128 Cal.App. 57, and *Osborn v.*
22 *City of Whittier*, (1951) 103 Cal.App.2d 609, but both cases are distinguishable based on *Stang v.*
23 *City of Mill Valley*, (1952) 38 Cal.2d 486, because, contrary to the facts in *Pittam* and *Osborn*, the
24 public entity defendant in *Stang* did not create the fire causing the damage to plaintiffs' property.
25 (*Id.* at p. 489.) In *Pittam*, the City of Riverside operated a dumping and burning ground for trash
26 where it intentionally burned trash in a “burning area.” (*Pittam*, *supra*, 128 Cal.App. at p. 58.) In
27 *Osborn*, the City of Whittier operated a rubbish disposal dump wherein it intentionally burned
28

1 rubbish on a continual basis. (*Osborn, supra*, 103 Cal.App.2d at p. 612.) The *Stang* court
2 affirmed the sustaining of a demurrer finding no liability under the Public Liability Act:

3 “As the maintenance and operation of a fire department is so distinguished as a
4 governmental function for the public good, it is ‘well settled that a municipal
5 corporation is not responsible for the destruction of property within its limits by a
6 fire which it did not set, merely because, through the negligence or other default of
7 the corporation or its employees, the members of the fire department failed to
8 extinguish the fire.’”

9 (*Stang, supra*, 38 Cal.2d at pp. 489-490.) The *City and County of San Francisco* court referenced
10 this passage from *Stang* as a basis for no liability prior to the enactment of the Government
11 Claims Act in 1963 and proceeded to evaluate the applicable statutory immunities after the
12 enactment of the Act. (*City and County of San Francisco, supra*, 160 Cal.App.3d at p. 840.) As
13 discussed above, the court found that the immunity of section 850 precluded liability based on the
14 failure of fire personnel to respond to the subject fire due to leaving their firehouse which “must
15 be viewed as a failure to provide fire protection service.” (*Id.* at p. 842.)

16 *McKay v. State of California*, (1992) 8 Cal.App.4th 937, does not apply to the facts of this
17 case as it addressed recoverable damages under Health and Safety Code section 13007 that
18 permits recovery for damages due to a negligently set fire such as a controlled-burn fire that
19 damages adjacent property. *McKay* did not involve a dangerous condition or nuisance cause of
20 action. (*Id.* at p. 938.)

21 With regard to the police protection immunity under Government Code section 845,
22 plaintiffs assert that, based on their concession that State Parks cannot be liable for the arsonist
23 starting the fire on January 1, this immunity does not apply. However, as discussed above,
24 plaintiffs’ allegations indicate that the fire that was started by an arsonist on January 1 was never
25 completely extinguished due to an underground ember that reignited on January 7. Thus, the
26 criminal arson was continuing and therefore the failure to discover this ongoing crime would be
27 covered by the police protection immunity.³

28
29

³ State Parks Rangers are peace officers under Penal Code section 830.2, subdivision (f) and
30 Public Resources Code section 5008.

1 In addition, to the extent the allegations that State Parks personnel should have gone up to
2 the fire area after January 1 to recheck the work of the LAFD by searching with a thermal
3 imaging device looking for the underground ember that caused the reignition on January 7, this
4 would involve State Parks' Rangers and therefore the additional immunity for police protection
5 would also apply.

6 Plaintiffs' Opposition also asserts that State Parks should have closed Topanga State Park
7 in the area of the January 1 burn scar. (Opp. p. 4:3-5, fn. 5.) There is no such allegation in the
8 Master Complaint. Plaintiffs also misstate the section from the Department Operations Manual
9 on which they rely by omitting the first sentence which states: "All or a portion of a park unit
10 *may* be closed when an unwanted wildland fire is threatening or burns on Department lands."
11 (State Parks Operations Manual, Natural Resources, § 0313.2.1.3, p. 03-48⁴, (emphasis added).)
12 Furthermore, plaintiffs have not and cannot explain how not closing the Park relates to providing
13 fire protection service by searching with a thermal imaging device for the underground ember that
14 reignited on January 7. Nevertheless, even if a decision not to close the Park could be construed
15 as a basis for liability, said decision would be covered by the police protection immunity.

16 **2) The Demurrer Should be Sustained as to the Nuisance Causes of Action**
17 **Without Leave to Amend**

18 State Parks' argument that a nuisance cause of action cannot be stated when the claim is
19 based on an alleged dangerous condition of public property is based on two Second District Court
20 of Appeal cases, *Longfellow v. County of San Luis Obispo*, (1983) 144 Cal.App.3d 379 and
21 *Mikkelsen v. State of California* (1976) 59 Cal.App.3d 621. The *Longfellow* court held that
22 plaintiffs have no cause of action under a nuisance theory where the action is based on a claim of
23 a defective condition of public property stating: "We deem it proper in this case where the action
24 is based on a claim of a defective condition of public property to follow the reasoning of the

25
26
27 ⁴ <<https://www.parks.ca.gov/pages/21299/files/DOM%200300%20Natural%20Resources.pdf>>
28

1 *Mikkelsen* court and find the plaintiffs have no cause of action under a nuisance theory.” (*Id.* at p.
2 384, following *Mikkelsen*.)

3 The *Mikkelsen* court noted that none of the cases that had allowed a nuisance action to
4 proceed against a public entity at that point in time, involved a dangerous condition cause of
5 action. (*Mikkelsen, supra*, 59 Cal.App.3d at p. 627.) The court declined to allow the plaintiffs to
6 proceed on a nuisance cause of action, in addition to a dangerous condition cause of action,
7 because to do so would thwart the legislative purpose of the dangerous condition immunities by
8 allowing maneuvering with the rules of pleadings and procedure in pleading on a theory of
9 nuisance or negligence. (*Id.* at p. 630 [Design immunity under Government Code section 830.6
10 cannot be avoided by pleading a cause of action in nuisance.].)

11 However, plaintiffs argue that these Second District Court of Appeal holdings should not
12 be followed based on a Third District Court of Appeal case, *Paterno v. State of California*, (1999)
13 74 Cal.App.4th 68, and a First District Court of Appeal case, *Pfleger v. Superior Ct.*, (1985) 172
14 Cal.App.3d 421. The *Paterno* court, relying on *Pfleger* disagreed with *Longfellow* calling it “an
15 anomalous decision.” (*Paterno, supra*, 74 Cal.App.4th at pp. 103-104.) The *Paterno* court did
16 not distinguish *Longfellow*.

17 Thus, there is a conflict on this issue between districts. “As a practical matter, a superior
18 court ordinarily will follow an appellate opinion emanating from its own district even though it is
19 not bound to do so.” (9 Witkin, Cal. Proc. 6th Appeal § 518 (2025), quoting *McCallum v.*
20 *McCallum* (1987) 190 Cal.App.3d 308, 315, fn 4.) In addition, State Parks submits that the court
21 should follow *Longfellow* and *Mikkelsen* as they are the better reasoned opinions. In this regard,
22 numerous cases addressing dangerous condition cases have held that, “the sole statutory basis for
23 imposing liability on public entities as property owners is Government Code section 835.” (*City*
24 *of Los Angeles v. Superior Court* (2021) 62 Cal.App.5th 129, 139, quoting *Cerna, supra*, 161
25 Cal.App.4th at p. 1347; see also, *Summerfield v. City of Inglewood* (2023) 96 Cal.App.5th 983,
26 993, *Brenner v. City of El Cajon* (2003) 113 Cal.App.4th 434, 438-439.)

27 In addition, the immunity under Civil Code Section 3482 precludes a nuisance cause of
28 action against State Parks because it is expressly authorized by statute to operate Topanga State

1 Park. Here, the underlying premise of plaintiffs' allegations are that State Parks' allowance of
2 naturally occurring growth of chaparral and other vegetation in its operation of Topanga State
3 Park constitutes a nuisance. In this regard, the specific statutory authority for State Parks to
4 operate the Park states that:

5 "State parks consist of relatively spacious areas of outstanding scenic or natural
6 character, oftentimes also containing significant historical, archaeological,
7 ecological, geological, or other similar values. The purpose of state parks shall be
8 to preserve outstanding natural, scenic, and cultural values, indigenous aquatic and
9 terrestrial fauna and flora, and the most significant examples of ecological regions
10 of California . . ."
11

12 (Pub. Resources Code, § 5019.53.) "Each state park shall be managed as a composite
13 whole in order to restore, protect, and maintain its native environmental complexes to the
14 extent compatible with the primary purpose for which the park was established." (*Id.*)
15 Thus, State Parks is authorized by statute to operate the Park which includes specific
16 authorization to allow naturally occurring growth of chaparral and other vegetation in its
17 operation of the Park.

18 In *Avedon*, as alleged here, the nuisance claim was premised on State Park's "maintaining
19 a dangerous condition of public property which allowed a severe fire risk to persist." (*Avedon*,
20 *supra*, 186 Cal.App.4th at p. 1345.) The *Avedon* court held that a nuisance cause of action against
21 State Parks was precluded by Civil Code section 3482 because it was authorized by statute to
22 operate Malibu Creek State Park wherein it was, pursuant to Public Resources Code section 5001
23 et seq., to administer, protect, develop, and interpret the property under its jurisdiction for the use
24 and enjoyment of the public. (*Id.*) The court concluded that State Parks' allowing access to the
25 cave where the fire started and the road near the cave, fell squarely within its statutory authority
26 to operate the park and therefore a nuisance claim could not be predicated on these actions. (*Id.*)

27 Similarly, here, State Parks' allowing naturally occurring growth of chaparral and other
28 vegetation in its operation of Topanga State Park falls squarely within its statutory authority to
29 operate the park precluding a nuisance claim. (See also *Pekarek v. City of San Diego* (1994) 30
30 Cal.App.4th 909, 917-918 [operation of ice-cream trucks on city's streets permitted by ordinance
cannot give rise to a nuisance claim].)

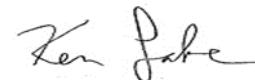

1 In addition, even if a cause of action for nuisance could be stated, which it cannot, the
2 immunities discussed above as precluding the dangerous condition causes of action also preclude
3 the nuisance causes of action. (*Cairns, supra*, 62 Cal.App.4th at pp. 332, 334-335; see also
4 *Schooler v. State of California* (2000) 85 Cal.App.4th 1004, 1012 [Nuisance theory of liability
5 against State fails because the existence of an immunity precludes any duty to abate a nuisance].)

6 **Conclusion**

7 For the reasons set forth above and in the moving papers, State Parks respectfully requests
8 that the court sustain the demurrer in its entirety without leave to amend.

9 Dated: January 15, 2026

DECLARATION OF SERVICE

2 I declare: I am employed in the City of Los Angeles, County of Los Angeles, State of
3 California. I am over the age of 18 years and not a party to the within action. My business address
4 is 300 South Spring Street, Room 1700, Los Angeles, California 90013. On January 15, 2026, I
5 served the documents named below on all interested parties in this action as follows:

1. REPLY TO OPPOSITION TO DEMURRER BY DEFENDANT STATE OF CALIFORNIA TO THE MASTER COMPLAINT

8 **BY ELECTRONIC SERVICE THROUGH THE CASE ANYWHERE SYSTEM:** I caused
9 service of such documents through the Case Anywhere system. The court has authorized
10 electronic service in this action through Case Anywhere, the designated online electronic service
11 provider in this case.

12 I declare under penalty of perjury under the laws of the State of California that the
13 above is true and correct. Executed on January 15, 2026.

/s/ Sandra Dominguez
